CAREER SUMMARY

Full-Stack Developer with expertise in Next.js (TypeScript), Node.js, Express, Nuxt3, and React. Currently working at Echo Solutions Ltd (Africa), building impactful web applications, with prior experience as a Frontend Developer at Design-Oxyll, focused on creating clean, scalable, and user-friendly solutions.

EDUCATION AND CERTIFICATION

Bachelor's in Progress	NED University of Engineering & Technology (IT)	Ongoing
Intermediate	Government Degree Boys College (Computer Science)	2024
Certification	Coursera (JavaScript & TypeScript Certification)	2025

TECHNICAL SKILLS

JavaScript/TypeScript, HTML/CSS, React, Next.js, Nuxt3 Tailwind CSS, Tailwind-Variant, MUI, Node.js, Express, MongoDB

WORK EXPERIENCE

Frontend Developer	Design-Oxyll	Nov 2024 – Apr 2025
<ul style="list-style-type: none">Developed and optimized responsive e-commerce applications using Next.js, TypeScript, Tailwind CSS, implementing state management (React Context API, Redux Toolkit) and applying JavaScript algorithms (binary search, hash maps, debounce/throttle) to improve data fetching, rendering speed, and UI responsiveness.Applied fundamental algorithms (sorting, searching, recursion, dynamic programming concepts) in production use-cases such as product filtering, search auto-suggestions, efficient pagination, and dynamic dashboards, ensuring seamless crossdevice user experiences in collaboration with design, backend, and QA teams.		
Full-Stack Developer	Echo Solutions	June 2025-Present
<ul style="list-style-type: none">Leading frontend development for an Africa-based movie streaming platform (similar to Netflix) using Next.js, React, and TypeScript, delivering responsive and user-friendly interfaces.Collaborating with the backend team on workflow design and API integration, contributing to algorithms for content recommendation, search optimization, and data-driven user experience.Engaged in both frontend and backend problem-solving, ensuring smooth functionality, scalability, and cross-platform performance across web and mobile applications.		

PROJECTS

ClinixPro : Empowering healthcare professionals nationwide with cutting-edge technology for seamless patient care, pharmacy management, and hospital administration. [View – Project]

Stoka : Stoka is an online inventory management system designed to help businesses track stock, sales, product management [View – Project]

Popcorn-Wise : A modern movie streaming web app built with Next.js and JavaScript, featuring an intuitive and responsive UI/UX. Integrated with TMDB API to deliver movie trailers, cast details, trending content, and personalized recommendations. Designed with a focus on performance, accessibility, and smooth user interaction for an engaging streaming experience. [view - Project]
